PERSONAL PROJECTS

Blogs-Node

- This project is a simple and easy-to-use blog for casual bloggers.
- Create, edit, and delete your posts.
- Utilizes the Express web framework.
- Uses MongoDB on the backend and uses Ejs views & layouts.

To-Do List

- To-do list app made with the MERN(Mongo Express React Node) Stack,
- Deployed with help of heroku.
- <https://secure-wildwood-72380.herokuapp.com/>.

JAVA: My Calculator

- This is a simple GUI calculator app that will perform basic arithmetic operations like addition, subtraction, multiplication, division etc.
- Created with Java AWT.

Python: Alien Invasion

- Alien invasion is a clone of popular arcade game with same name.
- I created this game by following the "Python Crash Course" book.

SKILLS

Programming Languages: JAVA, Python(basic), JavaScript(medium).

Operating System: Window, Linux, Android.

Database: MySQL, MongoDB.
